

Errata for 2021 National Standard Plumbing Code – 1st Printing

The following is a change that we found after the first printing of the *2021 National Standard Plumbing Code*. We do encourage you to make a note in your code book to ensure that the change is reflected. Thank you.

SECTION: 2.12 Sleeves for Piping

Paragraph a.) should read as follows:

a. A piping passing through concrete walls, floor, slabs, and masonry walls shall be provided with sleeves for protection.
EXCEPTION: Sleeves shall not be required for pipes passing through drilled or bored holes. Such holes shall provide ~~4~~¹/₂ inch minimum clearance around the pipe and any thermal insulation.

SECTION: 9.3.4 Standpipes
