IAPMO Seeks Public Input on Manual of Recommended Practice for Toilet Room Design: All Gender, Health, Safety, Privacy, and Security

Ontario, Calif. (Nov. 14, 2022) – The International Association of Plumbing and Mechanical Officials (IAPMO®) is seeking the public's input for the development of the *Manual of Recommended Practice for Toilet Room Design: All Gender, Health, Safety, Privacy, and Security*.

Created by one of several task groups formed through the IAPMO Technical Services Group, this manual addresses all-gender toilet room design. Those who follow proposed code changes in the plumbing and mechanical sector are aware of recent actions advancing language addressing all-gender restrooms. The Toilet Room Design Task Group's goal is to develop the *Manual of Recommended Practice for Toilet Room Design: All Gender, Health, Safety, Privacy, and Security* to address restroom design, particularly when it comes to health and safety concerns for all-gender toilet rooms.

IAPMO encourages the industry to provide your comments to the latest draft, which may be obtained through the following URL: <https://www.iapmo.org/standards-development/iapmo-industry-standards/20-day-public-review>.

Please provide your comments to standards@iapmostandards.org by no later than Dec. 19.

If you have any questions, please contact Christoph Lohr at (909) 731-0219 or christoph.lohr@iapmo.org.
