**ASPE, AWE, IAPMO, PMI and WPC to Present
Seventh Emerging Water Technology Symposium in San Antonio**

Ontario, Calif. (June 2, 2021) — The American Society of Plumbing Engineers (ASPE), the Alliance for Water Efficiency (AWE), the International Association of Plumbing and Mechanical Officials (IAPMO) and Plumbing Manufacturers International (PMI), in cooperation with the World Plumbing Council (WPC), will convene the seventh biennial Emerging Water Technology Symposium (EWTS) in San Antonio on May 10 and 11, 2022. The call for abstracts for this highly respected event has been issued and is available for download at <https://bit.ly/3vJx5UG>.

The seventh EWTS is co-convened by the four associations that have worked together closely over the past few years to grow the symposium and make it a can't-miss event for those who work or are interested in the fields of safe plumbing, water distribution and water efficiency. The co-conveners strongly encourage abstracts and participation from across the globe for the EWTS, which is an international event.

"The EWTS continues to grow and build upon a reputation for being an outstanding forum where attendees learn about and discuss the challenges associated with delivering safe water in and around buildings and the new technologies that will play a role in addressing those challenges," said Dave Viola, CEO of The IAPMO Group. "We're excited to once again co-convene the EWTS with ASPE, AWE and PMI, and we look forward to working with them on delivering another informative and timely symposium."

A series of videos and presentations from previous symposiums is available for viewing online at <http://www.youtube.com/user/IAPMOGroup>.
