

UNIFORM MECHANICAL CODE CALL FOR TASK GROUP PARTICIPATION

The International Association of Plumbing and Mechanical Officials are asking for Task Group participation and representation on various issues relating to the 2009 Uniform Mechanical Code. The Uniform Mechanical Code Technical Committee Chair is the appointing authority. [Click here](#) for Task Group form.

The deadline for request for information form is September 18, 2009.

- Ventilation Task Group
- Correlation Task Group
- Standards Task Group

Ventilation Task Group

The scope of this task group is to provide an alternate method in order to obtain outdoor air rates based on current technology. The objective includes reviewing current requirements based on industry standards and to make recommendations as proposed code changes to the 2009 Uniform Mechanical Code.

Correlation Task Group

The scope of this group includes the identification of technical and editorial inconsistencies within the 2009 Uniform Mechanical Code. In order to provide consistency and correlation, the inconsistencies will be identified and recommended as proposed. A shared understanding of technical and editorial correlation is necessary for the successful implementation of the code.

Standards Task Group

The scope of this group includes adding cross-references to Table 14-1 Index of the 2009 Uniform Mechanical Code to indicate where code sections of each standard are referenced and to update the format of standards based on materials and products.

Meeting notice will be posted on the IAPMO website at www.iapmo.org
