

**Summary of Substantive Changes
between the 2010 and 2010e1 editions of
ASTM F876, “Crosslinked Polyethylene (PEX) Tubing”**

Presented to the IAPMO Standards Review Committee on June 11, 2012

General: The changes to this standard are editorial and will not have an impact on current listings. The editorial changes are:

Section 3.2.7.2, Discussion: Editorially corrected as follows:

For non-potable piping, it shall be one of the classification digits from [Table 2 for the Nominal Exposure Time Period](#) from Table 1 of Test Method F2657 where the UV-exposed samples meet the requirement of 7.10 Stabilizer Functionality, or alternatively using the criteria for potable water piping found in the this clause.
