

**Summary of Substantive Changes
between the August 2010 and July 2012 editions of
SRCC Standard 100, “Test Methods and Minimum Standards for Certifying
Solar Collectors”**

Presented to the IAPMO Standards Review Committee on August 13, 2012

General: There are no significant changes to this standard and there should not be an impact on currently listed products. There are only formatting changes as follows:

- Increased the font size and changed the formatting.
- The underline was removed from the different types of collectors in Section 5.3.1
