

Summary of Changes
between the 6th edition dated July 16, 2009 and the August 25, 2011 update of
UL 1563, “Standard for Electric Spas, Equipment Assemblies, and Associated Equipment”

The changes are not critical or require re-testing. This revision of UL 1563 is being issued to:

- (a) update the electric shock limits for spa side controls and circuits in contact with the spa water;
- (b) clarify controls requirements for controls evaluated to UL 873 and add requirements to specify the use of controls that comply with the UL 60730 family of standards; and
- (c) delete Appendix A and specify component requirements in the body of the standard.
