Indoor Cannabis Cultivation Facilities

LEARN:
- Codes
- Design
- Growing processes
- New technologies

Friday, January 31
8am-5pm

Cultivation facilities are expensive, so using the right design and trades people means the project gets done to the benefit of the client without delay or changes.

This full day presentation covers plumbing, mechanical, building, fire, energy, state regulations, and limited electrical codes. The class also covers the growing process, from propagation to flowering and will help cultivators, regulators, architects, designers and engineers make sense of the myriad of regulations and special processes used in cultivation. We’ll also cover new technologies for cultivation.

Many mistakes are made from design deficiencies that may be code compliant, but make cultivation difficult. We’ll cover how to avoid the mistakes that currently plague the industry.

PRICE
IAPMO Members: $169
Non-Members: $199
