**IAPMO Reschedules 2011 Technical Committee Meetings
for Development of 2012 Solar, Swimming Pool Codes**

Ontario, Calif. (Jan. 31, 2011) — The International Association of Plumbing and Mechanical Officials (IAPMO) has rescheduled this year's Technical Committee meetings toward the ANSI-accredited consensus development of the 2012 editions of the *Uniform Solar Energy Code (USEC)* and *Uniform Swimming Pool, Spa and Hot Tub Code (USPSHTC)*.

The meetings will be held at IAPMO's new World Headquarters West building in Ontario, Calif., on Oct. 27-28. They were previously scheduled for Oct. 31.

The technical committees, consisting of a broad coalition of industry experts — installers, inspection officials, contractors, engineers and manufacturers — considered public proposals to amend the *USEC* and *USPSHTC* in advance of the release of the 2012 editions. Formal ballot voting on these proposals has concluded and the results will be published in the *Report on Proposals* next month and opened for public comment in April.

The *USPSHTC* governs the installation and inspection of both public and private swimming pools, spas and hot tubs to ensure the safety of their operation.

The *USEC* is a model code developed by IAPMO to govern the installation and inspection of solar energy systems as a means of promoting the public's health, safety and welfare.
