IAPMO’s Uniform Evaluation Service Issues ER-275 to Ware Industries dba Marino\WARE[®]

Ontario, Calif. (August 1, 2013) — IAPMO’s Uniform Evaluation Service (UES) is pleased to announce that New Jersey-based Ware Industries dba Marino\WARE[®], was granted UES Evaluation Report ER-0275 to reference the 2012, 2009 and 2006 *International Building Code*[®] (IBC), the 2010 *California Building Code*, the 2012, 2009 and 2006 *International Residential Code*[®]. ER-0275 states that FrameRite[®] Metal Connectors: UA, WSC, RCC, HDW, BH, WRC satisfy applicable code requirements. This allows for the specification of FrameRite[®] Metal Connectors: UA, WSC, RCC, HDW, BH, WRC by architects, contractors, specifiers, designers and approval of installations by code officials. It also provides code officials with a concise summary of the product’s attributes and documentation of code compliance.

Products recognized under the Uniform Evaluation Service have successfully undergone evaluation based on applicable requirements within the *Uniform Family of Codes* and the *International Family of Codes*, as well as codes published by other entities. UES staff thoroughly examined FrameRite[®] Metal Connectors: UA, WSC, RCC, HDW, BH, WRC product information, test reports, calculations, quality control methods and other factors to determine the product is code compliant.

“Marino\WARE[®] is extremely pleased with ER-0275 on our FrameRite[®] Metal Connectors: UA, WSC, RCC, HDW, BH, WRC,” said Jim DesLaurier, Vice President of Marketing. “We are so excited to be working with such a class organization as IAPMO. They have been extremely responsive and helpful through the entire process.”

The UES program is built upon IAPMO’s more than 70 years of experience in evaluating products for code compliance. Accredited by the American National Standards Institute (ANSI), the program operates under ISO/IEC Guide 65, “General Requirements for Bodies Operating Product Certification Systems.”

UES Director Richard Beck, PE, CBO, MCP, explains why Uniform Evaluation Reports are so valuable: Marino\WARE[®] can now reference its ER-0275 on FrameRite[®] Metal Connectors: UA, WSC, RCC, HDW, BH, WRC to ensure that code officials quickly have the information required for their decision on approval. Our program also stands out because of stellar customer service and the utilization of in-house staff along with the technical expertise of professional engineering firms, who are leaders in each area of recognition.”

IAPMO’s UES offers a full range of recognition opportunities, including recognition for the applicable national model codes, as well as Florida, California and various other state codes. The UES program lowers the cost and increases the value to code officials of these reports by combining all of these recognitions in one concise report prepared by an internationally recognized product certification body.

ABOUT IAPMO’S UNIFORM ES

The International Association of Plumbing and Mechanical Officials (IAPMO) coordinates the development and adaptation of plumbing, mechanical, swimming pool and solar energy codes to meet the specific needs of individual jurisdictions both in the United States and abroad. IAPMO Uniform ES (UES) is one of the two prominent evaluation service providers (as noted by SEAOC, see Uniform-ES.org for details). UES reports provide evidence that products and systems satisfy code requirements within the scope and conditions of use as noted in each report.

For more information on IAPMO Uniform ES, direct your Web browser to www.Uniform-ES.org or contact Richard Beck at (909) 472-4202 or richard.beck@iapmoes.org.

###

IAPMO Uniform ES evaluates building products, materials and designs according to all applicable codes and standards, ensuring continuous compliance to such documents.

IAPMO Uniform ES is part of The IAPMO Group.
