

**Summary of Substantive Changes
between the 2013a and the 2013a editions of
ASTM A888, “Hubless Cast Iron Soil Pipe and Fittings for
Sanitary and Storm Drain, Waste, and Vent Piping Applications”**

Presented to the IAPMO Standards Review Committee on November 9, 2015

General: General: The changes to this standard may have an impact on currently listed products. The major change is:

- Added the requirement that samples of coatings for testing shall be taken while in the original state at the point of application, and that the sampling be done on an annual basis (see Section 9.3)

Section 9, Coating: Added the requirement that samples of coatings for testing shall be taken while in the original state at the point of application, and that the sampling be done on an annual basis as follows:

9.3 Pipe and fittings shall not be coated with paint containing levels of volatile organic hazardous air pollutants (VOHAPs), which exceed levels of 2.6 lb (0.31 kg/L) of VOHAPs per gallon of solids. Reference Practice [D3960](#).

[9.3.1 A coating shall be sampled at the point of application, in its original state, not after the coating has been cured.](#)

[9.3.2 The manufacturer shall annually prepare and submit samples to a qualified laboratory for test in accordance with Practice \[D3960\]\(#\).](#)
