

**Summary of Substantive Changes
between the 2013a and the 2015 editions of
ASTM D2467 “Poly (Vinyl Chloride) (PVC) Plastic Pipe Fittings, Schedule 80”**

Presented to the IAPMO Standards Review Committee on June 8, 2015

General: The change to this standard should not have an impact on currently listed products. The substantive changes are:

- Added fittings dimensions and burst pressure requirements for NPS-14 and NPS-16 (see Table 1, Table 3, and Table 6).
