

**Summary of Substantive Changes
between the 2015 and the 2016 editions of
NSF/ANSI 44 “Residential Cation Exchange Water Softeners”**

Presented to the IAPMO Standards Review Committee on March 13, 2017

General: The change to this standard is editorial and should not have an impact on currently listed products. The editorial change is:

- Added a column for the Chemical Abstract Service (CAS) Number of the Analytes (See Table 4.1)

Table 4.1 – Extraction testing parameters: Added a column in Table 1 renumbered Table 4.1 for the Chemical Abstract Service (CAS) Number of the Analytes.
